### About This Game

## WELCOME TO REALITY FALLS

A dusty, dilapidated town on the former Soviet steppe, where Europe bleeds into Asia. People first settled here hundreds of years ago, but only a few remain. Reality Falls sounds like the adventurer's dream: a destination off the beaten track, home to a collection of oddballs and misfits, all yearning for something different. But something strange lurks within the curiously named Reality Falls.

## A STORY-DRIVEN ADVENTURE

From the co-creator of [Richard & Alice](#) comes a brand new story-driven adventure. Join Adrian Watts on the journey of a lifetime, as his round-the-world trip takes him to this unlikely destination. Meet its strange set of inhabitants, discover the town's fascinating history, and unravel the surreal and unsettling tale that begins to unfold.

Reality Falls fuses intricate storytelling with classic point-and-click puzzles and a retro JRPG-style look and feel.

## FOLLOW DEVELOPMENT

Follow development behind the scenes! Reality Falls is being crafted with an 'open production' methodology in mind. Visit the game's website and sign up to the newsletter for regular updates, design musings, and the chance to get your hands on the game before anyone else!
